

About All County

In 2007, Peter F. Artusa retired after a 22-year career as a local Police Officer and started A Sparkling View, LLC, window cleaning company. Peter purchased All County Window Cleaning in 2013. Today, we've grown to over 30 employees and cover over 9 counties in 3 states. By providing quality professional cleaning and excellent customer service, All County has become Orange County's premier exterior cleaning company.

We have always grown and adapted to stay up-to-date with the latest technology and cleaning processes. This now includes providing sanitizing services in line with the CDC and EPA to protect your property against COVID-19 and other germs.

Exterior Sanitizing

Our exterior sanitizing services follow CDC guidelines for disinfecting to help prevent the spread of COVID-19. Our services can be used on a variety of surfaces to remove 99.9% of germs that were there prior to cleaning.*

We recommend sanitizing high traffic areas and surfaces, such as:

- ✓ Sidewalks
- ✓ Entryways
- ✓ Outdoor Play Areas
- ✓ Railings
- ✓ Door Handles
- ✓ Shopping Carts

Our Commitment to Our Customers and Our Team

At All County Window Cleaning, the health and safety of our employees and our clients is of paramount importance. We are taking specific precautions in line with CDC and OSHA recommendations during the current COVID-19 outbreak.

We want you to feel comfortable working with our company as we clean and sanitize your property. That's we've implemented the several new safety policies.

Safety Precautions

- ✓ Providing flexible sick leave policies to ensure our employees stay home if they or family members are showing signs of illness.
- ✓ Requiring our employees to wash their hands for at least 30 seconds or use hand sanitizer after coming in contact with any foreign object.
- ✓ Routinely cleaning all frequently-touched surfaces in our workplace, such as workstations, counter tops, and doorknobs.
- ✓ Disinfecting any high-touch surfaces we come in contact with on your property, such as door handles, before leaving the jobsite.
- ✓ Not allowing employees to shake hands with customers.

*Our services can clean and sanitize against germs currently on surfaces. We cannot prevent recontaminating cleaned surfaces.

ABOUT OUR SANITIZING SERVICES

At All County Window Cleaning, we have diligently researched the CDC's recommended practices for disinfecting to help prevent the spread of COVID-19. Our team is educated, prepared, and ready to protect your property from 99.9% of germs and viruses that are on surfaces at the time of our cleaning.

Steam Cleaning:

The CDC reports that steam cleaners disinfect and kill 99.9% of germs. Steam must reach between 175 F to 212 F and stay in contact with the virus for at least 3 minutes. At All County, we have state-of-the-art, commercial-grade steam cleaning equipment that can sanitize without the use of chemicals.

Hot Water Pressure Washers:

Our services utilize water that's over 200 F, combined with industrial-grade bleach. The CDC has approved bleach as a method for disinfecting surfaces against COVID-19.

The CDC also said it's important to clean property in order to properly disinfect. Our services clean and sanitize in one quick swoop. We can be in and out without coming in contact with anyone on your property, and clean as much or as little as you require.
